

The TouchBistro Bar iPad POS Solution: Garnish Your Customer Experience.

MOST BARS ARE EXPERTS AT OPENING TABS FOR THEIR CUSTOMERS

But what about keeping tabs on the customer experience? From taking orders to processing payments, your bar is only as slick as your POS system. Having TouchBistro on tap, you can **lower your POS costs and increase your bar's value** by improving efficiencies in the front and back of the house. With all business elements seamlessly integrated on one iPad POS solution, you'll naturally better the customer experience and drive repeat business.

Get **smart features** that work

Customized Bar Tabs

Categorize and keep bar tabs by customer name or seating time. Merge existing bar tabs with a tap of your finger when a customer wants to buy a round.

Landscape Mode

Developed specifically for high-volume bartending, easily turnover peak times and rushes by locking TouchBistro in Landscape Mode and serving walk-ups more efficiently.

Detailed Visual Menu

Arm your staff with detailed information and visual images for each of your menu items, right in your POS! Easily store cocktail recipes and allergy information in your menu to assist with staff training.

Happy Hour Deals

Customize your happy hour deals by item, day, and time. TouchBistro will adjust the prices when the deal's active, and reset back to default amounts once happy hour is over, helping your business drive the most revenue.

Cloud Reporting

Get real time insight into your bar - anywhere, anytime, across any device. With TouchBistro's hybrid solution that leverages the convenience of the cloud, you can remotely access beautiful reporting dashboards that will help you visualize your bar's performance.

Drill Down Reports

Dig into the details of your bar's sales with reports that allow you to see category and menu item sales by the hour. Use the visual heat map report to understand what menu items are selling and at what times to make more informed decisions about staffing and inventory.
